

PRESS TO CHECK™

DAILY FACE-FIT REASSURANCE™

Face fit testing is reassuring but how can you be sure that you have donned the mask correctly each time you wear it? With Press To Check™ filters for the Force8™ halfmask you can instantly check that you have the correct seal every time you don your mask before entering the hazard zone.

✓ FIT IT

Don the Mask - Put the straps and harness over your head and pull the straps to a suitably tight and comfortable fit.

✓ PRESS IT

Press to Check™ - Press the front and backs of both filter covers together to stop air from entering through the filters.

✓ CHECK IT

Inhale - No air should come through the mask. Adjust the mask and repeat until it does not. Release when seal is made.
